1. Case Summary

CASE TITLE	Amazon seller account deactivation appeal
PLATFORM	Amazon
CASE TYPE	Account Ban / Appeal Builder
CREATED	Mar 3, 2026
LAST UPDATED	Apr 18, 2026

Amazon deactivated the seller account after a short carrier disruption affected fulfillment metrics. Nicholas documented the affected orders, implemented handling-time and backup-carrier controls, submitted a plan of action, and received reinstatement approval.

2. User Statement

I am requesting reinstatement of my Amazon seller account following the fulfillment-rate review. The late shipment metric resulted from a temporary carrier interruption, all affected buyers were contacted, and every delayed order was delivered or refunded. I have updated handling times, enabled backup-carrier routing, and documented a weekly account-health review. The attached records verify account ownership, the affected orders, and the corrective actions now in place.

3. Timeline of Events

Mar 3, 2026 - Seller account deactivated
